

EF234405 Design & Analysis of Algorithms (D, IUP, E, F, G)

Quiz 2

Release Date:	7 May 2026
Start Date:	8 May 2026
Deadline:	15 May 2026, at 23:59 WIB.
Late Penalty:	A penalty of 0.15% of the grade per minute will be applied to late submissions
Exam Type:	Open-Book, Group Project (max. 3 students per team). Groups can consist of students from Class D, IUP, E, F, G, or any combination of these.

Submission Guidelines

Email To:	MM Irfan Subakti <yifana@gmail.com>
CC:	Fellyla Fiorenza Wilianto <fellyla.hyuga@gmail.com>, Putri Meyliya Rachmawati <putrimeyliyaalfath@gmail.com>, Syalbia Noor Rahmah <syalbiaishere@gmail.com>, Iffa Amalia Sabrina <iffaamaliasabrina@gmail.com>, Muhammad Rafi Budi Purnama <mrafibudip@gmail.com>, Aqila Zahira Naia Puteri Arifin <aqilazhn05@gmail.com>, Rhenaldy Chandra <itsrhenaldy@gmail.com>, Ricardo Supriyanto <ricardo.supriyanto08@gmail.com>, Amelia Nova Safitri <amelianovasafitri@gmail.com>, Thalyta Vius Pramesti <thalytapramesti@gmail.com>
Email Subject:	EF234405_DAA_Q2_StudentID1_Name1_StudentID2_Name2
File Submission:	Submit a single ZIP archive named EF234405_DAA_Q2_StudentID1_Name1_StudentID2_Name2.zip . This archive must contain two files: (1) Report.pdf (design, implementation, evaluation, and conclusion), (2) Declaration.pdf (the signed Academic Integrity Pledge).
GitHub Repository:	In the body of your email, you must include a public link to your GitHub repository containing the complete source code for your project.

Instructions

Please follow the instructions below to complete your Quiz 2.

1. **Form a group** of up to 3 students.
2. **Develop a computer program** for your group project (e.g., a game, start-up idea, etc.). The program must implement at least one algorithm discussed in the course (e.g., DFS, BFS, DAG, Prim-Jarnik, Dijkstra, Kruskal, etc.). *Examples: a game that finds the shortest path, a minesweeper game, or a web application that calculates the minimum delivery route between two locations.*
3. **You may use any programming language** (e.g., C/C++, C#, Java, Python, etc.).
4. **Upload your project to GitHub.** Your contribution to the GitHub repository will be used to assess individual participation.

5. Grading Criteria

- Design [20 points]
- Implementation [50 points]
- Evaluation [25 points]
- Conclusion [5 points]

Total: [100 points]

6. **Plagiarism & Academic Honesty Policy:** To prevent plagiarism and cheating, every student must sign and include the following pledge in their report. The signature may be handwritten or digital. Failure to do so will result in a grade of zero (0).

“By the name of Allah (God) Almighty, I hereby pledge and declare that I have completed Quiz 2 independently. I have not engaged in cheating, plagiarism, or received unauthorized assistance in any form. I further declare that any use of AI tools was limited to a supportive role (such as for grammar checking or debugging), and that the final solution is the product of my own intellectual effort. I understand that I will accept all consequences if I am found to have violated this academic integrity pledge.”

[City, e.g., Surabaya], [Date, e.g., 15 May 2026]

<Your Signature>	<Your Signature>	<Your Signature>
[Full Name, e.g., Indah Setiani]	[Full Name, e.g., Turangga Geni]	[Full Name, e.g., Muliawati Riyani]
[StudentID, e.g., 5025221xxx]	[StudentID, e.g., 5025221xxx]	[StudentID, e.g., 5025221xxx]

Also, to ensure fairness in grading, clearly state each member’s percentage of contribution and their specific roles. For example:

- Indah—33.33%: *Designed the user interface and implemented the DFS algorithm.*
- Turangga—33.33%: *Handled backend logic and developed the main structure.*
- Muliawati—33.33%: *Perform analysis, testing, and write the final report.*

7. Good luck! 😊
